Metabolic Repair Technology

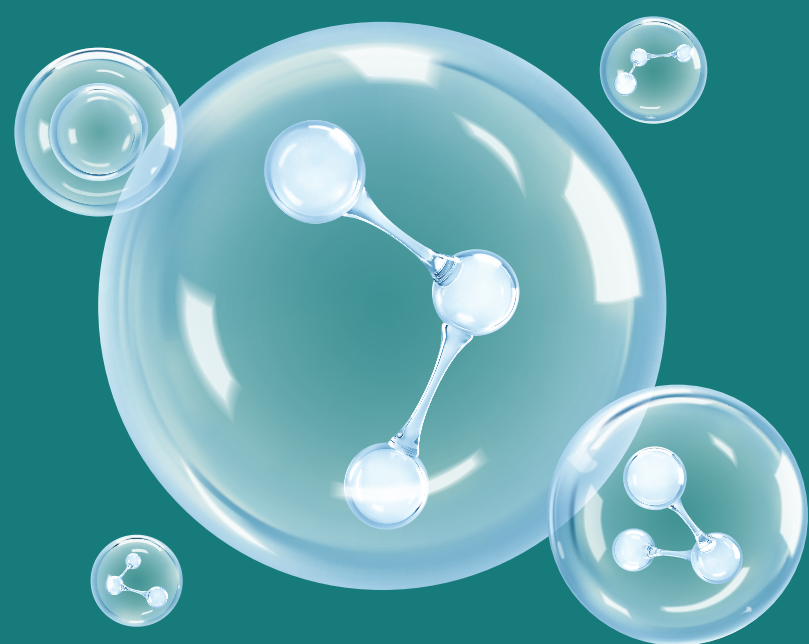

代谢修复技术

The Self-healing Mechanism Of Human Diseases / 人体疾病自我修复机理	
Scientific Basis:	The human body self-regulates and repairs. The brain manages organs and limbs via the nervous system following genetic programs.
Technology Principle:	Activating the body's self-balancing system repairs damaged tissues. NASA's PEMF technology proves effective in promoting cell growth, addressing astronauts' osteoporosis and muscle atrophy.
Theoretical Origin:	In 1961, Robert Becker found injuries trigger nerve electrical signals that prompt embryonic cells to repair tissues, explaining TCM's self-healing concept from a modern medical view.
Electrical Stimulation:	A New Medical Era (April 2015, Scientific American) confirmed modern medicine's chemo, radiation, antibiotics and surgery treat diseases but cause side effects, harming organs and immunity. Bioelectronic medicine uses neural electrical stimulation - based on nerves' electrical signaling to (pioneer) new therapy. It replaces drug use with electrophysiology: sending signals, amplifying bioelectricity, and triggering nerve endings to release drug-like substances. Safer and more effective than traditional methods, it boosts the body's natural disease-fighting ability.
科学基础:	生命科学证实，人体是具备自我调节、修复与平衡能力的有机整体。大脑依照遗传基因程序，通过神经系统管理内脏与肢体。
技术原理:	科学家发现，激活人体自身平衡调控系统，可修复受损的脏腑组织。美国太空总署（NASA）运用PEMF技术，有效解决宇航员骨质疏松与肌肉萎缩问题，并证实该技术能促进多种细胞生长。
理论起源:	1961年，Robert Becker 在《骨与关节外科杂志》发表研究成果：动物和人体受伤后，伤处神经会产生电流修复信号，大脑接收后，会促使原胚细胞对创伤处的神经、血管、肌肉和骨骼进行代谢修复。这一“创伤电流”理论，从现代医学角度为中医的人体自愈。
电疗:	2015年4月《环球科学》《电刺激开创医学新时代》指出：现代医学的化疗、放疗、抗生素及手术等治疗手段，虽可应对多种疾病，但副作用明显，会损害人体器官功能与免疫系统。而神经以电信号传递信息，基于此发展的生物电子医学，通过神经电刺激疗法开启疾病治疗新方向。电刺激疗法利用机体反射活动，以电生理效应替代部分药物治疗。它通过传递神经电信号、放大细胞生物电，刺激神经末梢释放具有药物功效的活性物质。相比传统治疗手段，电刺激疗法更注重激发人体自身抗病能力，安全有效，优势显著。

Hydrogen's Health Advantages
